Notes:

---

Please list as clear as you can the directions to your building site. Note all major highways and the best secondary roads for a tractor-trailer (18-wheeler) to access your site. The job site should have enough room for the truck to turn around or be able to back up. You will need unloading equipment (fork lift which is recommended) ready when truck arrives. Items also needed at your site are “stickers” for lumber to be place on. Plus any additional man-power that might be available.
